Emblema, for Faema Lovers.

<http://emblema.faema.com>

Emblema:

Faema's new flagship espresso machine.

The road towards the future has been outlined and Emblema is the result of Faema's collaboration with Giugiaro Design. Its sleek design, exclusive technology and superior performances result in an extraordinary in-the-cup quality. The adjustable thermal balance system allows you to fine tune the brewing temperature in order to extract the best from the different coffee blends. The exclusive Smart Boiler guarantees always ideal hot water and steam productivity. Emblema can also be equipped with the Auto Steam, a steam wand that simultaneously delivers steam and air, allowing the hands-free heating or frothing of large amounts of milk. Easy to use, the Auto Steam produces a perfectly frothed milk with consistently dense and velvety cream while maintaining a real Italian café look & authentic steaming sound.
